

Gear and Cam Pumps

Product series ZP, 206

For oil.
For use in SKF CircOil centralized lubrication systems.

Gear pump ZP1

Cam pump 206-100

The gear and cam pumps in this brochure are **lubricant pumps** that can be used for a large number of tasks.

The indicated delivery rates apply to an operating viscosity of 140 mm²/s and a back pressure of 5 bars. If the operating viscosities or back pressures deviate from these values, the delivery rate and power requirements will change.

Permissible operating viscosity:
20 to 1000 mm²/s.

Filtering

The pumps require filtration of the lubricant for a maximum particle size of 100 µm.

If the metering elements, valves, flow monitors, etc. as well as the friction points to be supplied require finer filtration, that must be provided for in the delivery line (recommended value 25 µm).

Gear Pumps

For clockwise or counterclockwise rotation, with constant direction of rotation and delivery

Table 1

Order No.	Delivery rate at 1 400 r/min [l/min]	Max. back pressure [bar]	Required drive power [kW]	Suction head ¹⁾ [mm]	Direction of rotation	Figure
ZP12-2	1.2	25	0.18	500	right	1
ZP1 ZP1-S1	2.5	20	0.18	1000	right left	2

Direction of rotation = viewing on the drive shaft.

Order adapters with ports tapped for solderless tube connection separately.

¹⁾ with open delivery line at 1 400 r/min

Figure 1

ZP12-2

Figure 2

ZP1, ZP1-S1

S = suction port, P = pressure port

- ¹⁾ ZP1: Direction of rotation right (viewing on the drive shaft)
- ²⁾ ZP1-S1: Direction of rotation left (viewing on the drive shaft)

CAUTION

The important information on product usage located on the back cover applies to all systems described in this brochure.

The Power of Knowledge Engineering

Combining products, people, and application-specific knowledge, SKF delivers innovative solutions to equipment manufacturers and production facilities in every major industry worldwide. Having expertise in multiple competence areas supports SKF Life Cycle Management, a proven approach to improving equipment reliability, optimizing operational and energy efficiency and reducing total cost of ownership.

These competence areas include bearings and units, seals, lubrication systems, mechatronics, and a wide range of services, from 3-D computer modelling to cloud-based condition monitoring and asset management services.

SKF's global footprint provides SKF customers with uniform quality standards and worldwide product availability. Our local presence provides direct access to the experience, knowledge and ingenuity of SKF people.

Important information on product usage

SKF and Lincoln lubrication systems or their components are not approved for use with gases, liquefied gases, pressurized gases in solution and fluids with a vapor pressure exceeding normal atmospheric pressure (1 013 mbar) by more than 0,5 bar at their maximum permissible temperature.
