

Data sheet

# Heavy duty pressure switch

## MBC 5000 and MBC 5100

MBC pressure switches are used in industrial and marine applications where space and reliability are the most important features.

MBCs are compact pressure switches, designed according to our block design to survive in the harsh conditions known from machine rooms onboard ships.

MBCs have high vibration resistance and MBC 5100 features all common marine approvals. The fixed, but low differential guarantees accurate monitoring of critical pressures.

MBV test valves can be delivered as standard option for MBC.

### Features

- Designed for use in severe industrial, environments,
- High vibration stability
- Part of the Danfoss block system, consisting of MBC pressure controls, MBS pressure transmitters and MBV test valves
- MBC 5100 with all major ship approvals,
- High repeatability,
- Optimal compact design for machine building purposes
- Intended for alarm indication, shut down, control and diagnostics in many applications - motors, gears, thrusters, pumps, filters, compressors etc.

### Approvals

EN 60947-1  
EN 60947-4-1  
EN 60947-5-1

China Compulsory Certificate, CCC

### Ship approvals, Type MBC 5100

**Technical data**
*Performance*

Repeatability	Bellows versions	± 0.2 % FS (typ.) ± 0.5 % FS (max.)
	Diaphragm versions	± 0.5 % FS (typ.) ± 1.0 % FS (max.)
	Piston versions	± 1.0 % FS (typ.) ± 1.0 % FS (max.)
Max. switch frequency		10/min (0.16 Hz)
Differential		See page 4
Permissible operating pressure		See page 4
Burst pressure		See page 4
Life time	Mechanical for diaphragm and bellows	> 400,000 cycles
	Mechanical for piston type	> 1 million cycles
	Electrical at max. contact load	> 100,000 cycles

*Electrical specifications*

Switch		SPDT
Contact load	AC 15	0.5 A, 250 V
	DC 13	12 W, 125 V

*Environmental conditions*

Temperature	Operation	Bellows versions Diaphragm versions Piston versions	-40 – 85 °C -10 – 85 °C -40 – 85 °C
	Transport	Bellows versions Diaphragm versions Piston versions	-50 – 85 °C -50 – 85 °C -40 – 85 °C
Enclosure			IP65, EN 60529
Vibration stability	Sinusoidal	20 g, 25 – 2 kHz	EN 60068-2-6
		Piston type 4.4 g, 25 – 200 Hz	

*Mechanical characteristics*

Pressure connection	Standard	G ¼ female (ISO 228-1) or flange
	Option	See specification form, page 4
Electrical connection	Plug	DIN 43650, Pg 9 / Pg 11 / Pg 13.5
Wetted parts material	Housing	Anodized AlMgSi1, AW-6082T6
	Bellows	Stainless steel 1.4306 (18/8), acc. to EN10088-2
	Diaphragm	FKM
	Piston	Stainless steel 1.4028 (3H13), acc. to EN10088-2
	O-ring	NBR
	Hole plug (flange version)	Nickel plated brass or zinc plated steel
	Seal (piston version)	Turcon T05
Enclosure material	Housing	Anodized AlMgSi1, AW-6082T6
	Plug fixture	Glass filled polyamid, PA 6.6
	Contact system	Silver (AG) microprofile
Net weight		0.25 kg

*Thread*

*Flange connection on MBV 5000 Test Valve*

**How to choose**

To achieve the best operating conditions for MBC pressure controls, it is recommended to apply the following rules of thumb.

Choose:

- The MBC type/types which meet the demands for the operating pressure
- The MBC version with the lowest possible setting range
- A diaphragm type, if pressure peaks and pulsations occur in the system (if possible)
- Bellows type, if low differential is needed
- Piston type for high pressure
